

NEW

BS 5534 – CHANGES TO REGULATIONS

ONE DAY

Here at Redland, we're aware that any changes to British Standards or industry Codes of Practice can be a big headache for businesses.

Designed for managers, architects, contractors and merchants, this course is aimed at anyone who is involved in the construction or maintenance of roofs or the supply of products for them.

It highlights the most significant elements of the revised British Standard, explaining how this affects your business and the construction of the roof. The course also identifies how you can meet the changes with Redland products, allowing you to keep one step ahead and giving you confidence to advise your customers.

OVER THE COURSE OF THE DAY, YOU WILL:

- Understand the use of the new Code of Practice and the theory behind it
- Look at a summary of the main changes to the British Standard
- In the workshop, construct a full roof system to the revised British Standard
- Look closely at tile fixings, underlay, battening and the revised guidance on the use of mortar
- Fit both a dry fix verge and ridge system

“*Very informative – given me a lot to think about!*”

C Wheeldon, Southern Counties Roofing
