

ESTIMATING

TWO DAY

“The course was brilliant! Very well presented and extremely worthwhile.”

T Peach, Bracknell Roofing

Designed to build confidence and understanding of basic estimating.

By using real-life examples and scale plans, we take you through estimating terminology and techniques, practical drawing exercises, drawing to scale and quantity take-offs, using a variety of Redland's tiles and components.

Popular with our merchants and contractors who are finding that offering an in-house estimating service adds value to their services. This course gives confidence to counter staff and contractors when doing quantity take-offs for clients.

OVER THE TWO DAYS YOU WILL:

- Familiarise yourself with elevations and scale
- Work with constant tables and pitch finders
- Calculate roof dimensions and areas
- Work to produce your own scale drawings
- Conduct a practical, outdoor survey and take-off
- Carry out take-offs for Redland's tiles and components

DURATION

Held across two days, with a 9am start both days and an approximate 4pm finish. Teas, coffees and lunch provided.

TO BOOK

Simply call 01285 863543 or email training.redland@monier.com to find out the next available course dates.

COST

Due to the advanced nature of this course, the price is £145 + VAT for the two days. NFRC funding may be available to members.
