

CASE STUDY

KEEPERS COTTAGE
Kent

PROJECT
New Tudor-Inspired Cottage

DEVELOPER
JP Whelan Homes

PRODUCT
Rosemary Clay Classic
in Medium Mixed Brindle for vertical tiling
and Russet Mix for roof

REIMAGINING THE PAST

When JP Whelan Homes set out to create a new Tudor-inspired cottage in the picturesque Bough Beech Reservoir area in the Kent countryside, stunning aesthetics were at the top of the list of priorities.

Built as a re-creation of the two dilapidated cottages originally based on the site, traditional materials were chosen to match the unique styling of the original properties.

For this reason, Redland's Rosemary Clay Classic tiles were selected. Perfectly suited to Keeper's Cottage, Rosemary gave a classic and timeless look to the property. By matching the cottage's red brickwork with a Medium Mixed Brindle tile colour on the vertical tiling, a variable mix of medium-toned brindled clay, and a contrasting sanded Russet Mix colour on the roof, developer JP Whelan was able to create a truly striking effect.

For construction, the project required enough Rosemarys to tile both the main house and the double garage, along with a plethora of other materials, so logistics were never going to be simple.

Alan Wickham of JP Whelan was more than happy with the support provided by Redland: "We always use Redland because the quality is very good and they provide us with backup if anything ever goes wrong during a project."

With Redland tiles, JP Whelan created a home which paid homage to its Tudor past while also enjoying a build quality only possible in modern times.

The Rosemary name is synonymous with quality clay plain tiles, adding distinction and character to pitched roofs for over 175 years. Offered in a range of single and cross-camber tiles and produced from the finest clays, Rosemary is offered in a range of weathered, brindled and single colours.

**WE
ALWAYS USE
REDLAND - THE QUALITY IS
VERY GOOD**
